1) This does not include the section of SR 836 that extends from Florida's Turnpike to NW 137th St., as this section is only open to SunPass transactions.

2) Tolls are collected only in the northbound direction at the New Rochelle mainline barrier. The tolls in this table are divided by 2 to reflect the round trip price.

3) The Berkshire Connector is a ticket system. The movement represented id from the Massachusetts border to Exit 22 (Selkirk, NY) on the New York Thruway (I-90).

4) The Sam Rayburn Tollway (NTTA 121 Tollway) is an all electronic toll road. There are no toll booths. There is a ZipCash Video Toll option for vehicles without TollTag. This is a new roadway. The first section opened in July 2006, and the second section opened in September 2008. The entire project will total 26 miles of tollway.

5) The thru rate includes only the toll for the portion of road under the Orlando-Orange County Expressway Authority. It does not include sections of road operated by the FL DOT or Florida's Turnpike Enterprise.

6) The CV toll is represented by PTC Class 6 - 5 axes.

7) The Central Texas Toll Roads opened in stages beginning in Nov 2007.

NOTE: Blue indicates a toll facility where the through trip toll is different by travel direction.
